EPA, REGION III
OFFICE OF REGIONAL ADMINISTRATOR
OFFICE OF

SOLID WASTE AND EMERGENCY RESPONSE

MAY 19 1987

MEMORANDUM

SUBJECT: Twelfth Remedy Delegation Report - Part One
FROM: J. Winston Porter
Assistant Administrator
TO: Regional Administrators
Regions III and VI

Pursuant to EPA Delegation Authority 14-5 and the new procedures dated March 24, 1986 (OSWER Directive 9260.1-2), the Twelfth Remedy Delegation Report - Part One describes five remedial actions delegated to the Regional Administrators (Presque Isle, PA; Compass Industries, OK; Sand Springs, OK; Highlands Acid Pits, TX, and French Limited, TX). Part Two of the Twelfth Remedy Delegation Report describes an additional four remedial action delegations.

In addition to the on-going consultation between Regional Coordinators and Regional Project Managers, more formal consultation between the Regional Branch Chief and the Director, HSCD, is requested for Highlands Acid Pits, TX, due to issues related to determination of ground water cleanup levels. More formal consultations between the Regional Division Director and the AA-OSWER are requested for Compass Industries, OK; Sand Springs, OK; and French Limited, TX, due to possible fund balancing issues in relation to application of appropriate technologies. The remedial actions delegated in this report are described on the following page.

Delegation briefing summaries for Fourth Quarter FY 87 should be submitted to Headquarters by June 10, 1987. This will be the last scheduled submittal of Delegation Summaries for FY 87. We urge you to get all your planned delegation requests in at this time. According to our records, approximately 46 sites still require a decision on ROD delegation this fiscal year. If you have any questions, contact Bill Kaschak (FTS 382-2348) in the Hazardous Site Control Division or Frank Russo (FTS 482-4838) in the CERCLA Enforcement Division.

AR300313

Delegated To Regional Administrator

<u>Region</u>	<u>Site/State</u>	<u>Proposed Remedy</u>
III	Presque Isle Site Erie County, PA	No remedial action necessary based on site investigation.
VI	Compass Industries (Avery Drive) Tulsa, OK	Address on-site landfill and contaminated ground water. Consultation requested between Regional Branch Chief and Director, HSCD.
VI	Sand Springs Petrochemical Complex Sand Springs, OK	Source control for onsite pits, lagoons and surface contamination. Consultation requested between Regional Division Director and AA-OSWER.
VI	Highlands Acid Pits, ACL Highlands, TX	Address on and off-site groundwater contamination. Consultation requested between Regional Branch Chief and Director, HSCD.
VI	French Limited Crosby, TX	Address on-site lagoon and limited off-site contamination. Consultation requested between Regional Division Director and AA-OSWER.

Note: See Part Two for four other delegated RODs.
